JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

of the vacation of any such apartment in order that adequate disinfection may be performed by this board.

Resolved, That the public health requires that in all cases except where extreme precautions have been taken to prevent the apartment from becoming infected the disinfection shall be performed by thoroughly wetting with formaldehyde the walls, ceiling, and floor of the rooms occupied by the patient. In all other cases the rooms so occupied shall be disinfected with formaldehyde gas, or, at the discretion of the board, by thorough cleaning and renovating.

Resolved, That the board of health hereby directs that no person having tuberculosis of the lungs shall be allowed to remain in the same household where there are children under 16 years of age unless the patient can be and is adequately separated from the children so that in the judgment of the board there is no danger of the transference of infection.

Ice Cream—Board of Health to Regulate Manufacture of—Bacterial Standard.
(Ord. Oct. 29, 1913.)

An ordinance entitled "An ordinance establishing a sanitary code for the town of Montclair," passed April 9, 1907, is hereby amended as follows:

Article 7, section 6, by adding thereto two clauses, as follows:

1. The board of health may, from time to time, when in its opinion the public interest may require, permit, by resolution, the sale of ice cream that is manufactured from milk and cream that could not legally be sold as milk and cream, provided that such milk and cream are pasteurized at a temperature equivalent to 145° F. for 20 minutes, and provided that the maximum allowable bacteria counts of the pasteurized milk and cream are set forth in the resolution.

2. No person shall sell or offer for sale in the town of Montclair any ice cream that contains over 500,000 bacteria per cubic centimeter, measurement to be made immediately after the ice cream has been reduced to a fluid condition.

Ice Cream—Manufactured from Pasteurized Milk—Bacterial Standard. (Reg. Bd. of H., Dec. 9, 1913.)

Resolved, That until this resolution is rescinded ice cream that is manufactured from milk and cream that could not legally be sold as milk and cream may be sold in the town of Montclair: *Provided*, That the milk and cream are obtained from dairies that score at least 60 on the United States Bureau of Animal Industry score card: *And provided*, That the cows have been examined by a veterinarian within one year and have been found to be in good health: *And further provided*, That the said milk and cream are pasteurized by the holding process at a temperature equivalent to 145° F. for 20 minutes and that the bacteria count of the milk at no time after pasteurization exceeds 50,000 per cubic centimeter and that the bacteria count of the cream at no time after pasteurization exceeds 250,000 per cubic centimeter.

Meat—Inspection Before and After Slaughtering. (Ord. Oct. 28, 1913.)

An ordinance entitled "An ordinance establishing a sanitary code for the town of Montclair," passed April 9, 1907, is hereby amended as follows:

Article 7, section 9, by adding thereto the following clause:

No pork, beef, veal, mutton, or lamb nor any part of any animal from which any of said meats is obtained shall be sold for food purposes or exposed for sale or held in possession in a store in which food is sold, unless the said animal has been examined both before and after slaughter by a meat inspector duly appointed by the United States Government, or by some other competent public official, and has been passed as fit for food and has been stamped with a proper identification mark or marks accord-
